

# Catalytic connections

Lighthouse is an innovation hub, catalysing important connections so young people can thrive. This starts with fostering relationships. We never know how things may evolve with small inroads and connections often leading to much bigger outcomes. Below is an example of the flow of conversation that resulted in Emma being supported to thrive. It demonstrates the power of multiple connections and the impact of relationships as a catalyst for positive change.

The pathways are often unconventional and in fact, the solutions usually lie outside the “system”. Engaging with the business community has provided social capital and different ways of thinking leading to change.

Social connection.

Catalytic.

Diverse collaborations.

Equity, access, inclusion, belonging, trust and respect.
