

About Us...

Geoffrey Thompson Holdings (commonly known as Jeftomson) was established in 1949 by Mr Geoffrey Thompson Snr. The company started as an exporter of apples and pears to the United Kingdom, Europe & South East Asia. It has since grown into a vertically integrated horticulture business, having full control of the product from growing, storing, packing and transporting, through to sales and marketing. The company has a fully established mechanic workshop and a fully accredited transport business. With direct relationships with all Australian retailers, Jeftomson also continues to service the export market.

Jeftomson owned orchards grow six varieties of apples:

Royal Gala

Fuji

Red Delicious

Granny Smith

Pink Lady

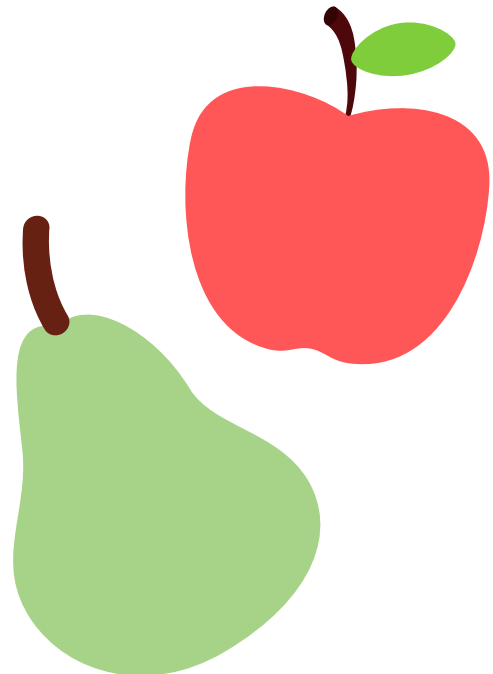

Dazzle (soon to be released)

And there are three varieties of pears:

Williams

Packhams

Beurre Bosc

Apples and pears from the company orchards are packed in the packhouse located at Wheeler Street. Jeftomson also provides packing and storage services to other local orchard based businesses.

How it all fits together and the jobs required to make it work ...
