

Making A Bin Liner

We are being encouraged to reduce our use of plastic bags so here's one fun way to make a non-plastic bin liner.

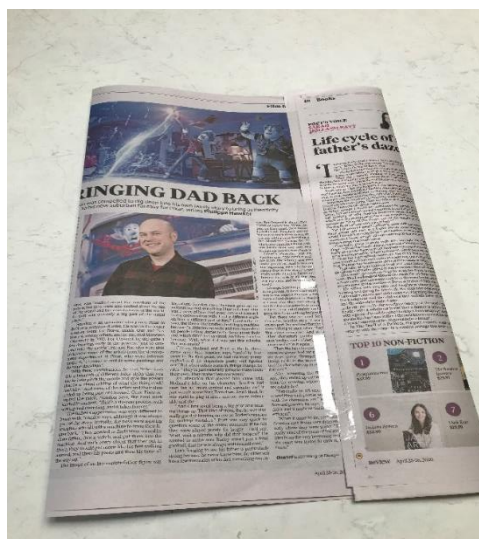

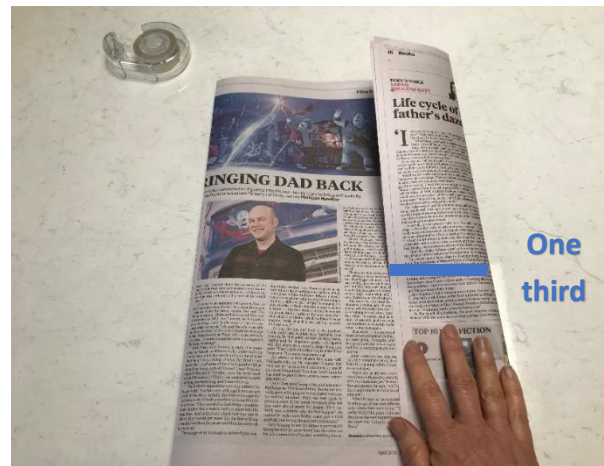

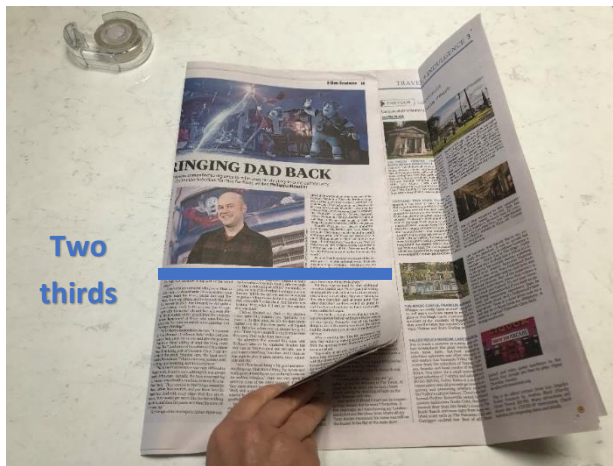

You will need:

- 2 pieces of newspaper
- Sticky tape

Step 1

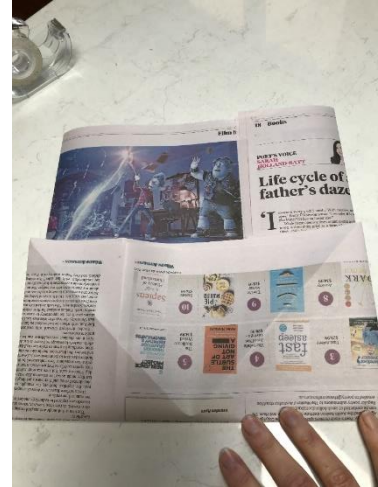

Fold the paper so the first side is folded in 2/3 and the second side in 1/3 but they slightly overlap then tape together.

Making A Bin Liner

Step 2

Create fold lines by first folding 2 angles (fold one side before opening it & folding the other side), then fold the flap from the bottom to the middle.

Step 3

Now to create the bottom of bin liner by re-folding using the fold lines and taping the bottom

Making A Bin Liner

Step 4

Then fold and tape again.

Step 5

Stand it up and you have a bin liner. Congratulations!
