

A COMMUNITY RE-ENGAGEMENT PROJECT FOR YOUNG PEOPLE

Pit Stop is a strengths based re engagement offering, co designed with community matching positive role models and mentors with young people. Young people will work on small engines and cars under the guidance of volunteer industry professionals and positive community role models.

Pit Stop aims to increase work and life skills, improve mental health and increase connection for young people within the community whilst better connecting them to opportunities through the bridging of social capital. This community initiative will also work with at risk young people as an early intervention model to re-engage them at school.

GET INVOLVED

If you are keen to get involved with this project as a potential user group we love to co design our offering so it meets your needs - yell out and we can have a chat about what kind of engagement will suit you or your group.

If you have items to donate; we are currently seeking some durable outdoor seating, an air compressor, work shop fans, etc. We love to recycle so have a chat with us if you have anything you think may be useful and we'll gratefully give it a second life.

If you have skills to share we are seeking volunteer mentors to support our young people.

A couple of hours once a month or fortnight would be amazing. So if you are practically / mechanically minded or simply just a good egg we would love to have you on board.

TO GET INVOLVED OR FIND OUT MORE

If you can help, want more information or to arrange a site visit for potential user groups please contact Amy Robinson Coordinator Industry Links & Strategic Projects at Lighthouse Project on 0438 308 581 arobinson@slp.com.au
